Pg 5	Order Form
Pg 6	Pricing and Lead Times

Accessories are available for Carbonautica wheels separately
Email info@edsonmarine.com to find out about wheel covers and hub covers.

If you are looking to upgrade from an Edson Diamond Series Wheel, please check to see if your wheel is tapered or straight. If it is straight and the wheel flange is welded on, you may need to replace the wheel shaft as well. Please [email](#) or call our office at (508) 995-9711 to discuss.

Tapered Hub

Tapered hubs are standard for carbonautica wheels.

Straight Hub

Straight hubs are special order for 1" wheel shafts with 1/4" key ways.

***Dimensions are in mm and dimensions in () are in inches.*

Standard Hub

Standard hubs are available on all carbonautica wheels in tapered or straight.

Slim Hub

Slim hubs are only available on wheel sizes 800mm and 900mm, and only available as tapered.

***Dimensions are in mm and dimensions in () are in inches.*

5 Spoke

3 Spoke

Custom Colors

For Glass Fiber Composite (GFC) Wheels

Black and white are standard colors. For custom colors, any number from RAL classic 1000-9023 can be chosen for an additional fee. RAL colors are defined by a 4 digit code. For example the standard white is 9003 and black is 9005. Using the [RAL color chart](#) sort the middle drop down "All colour palettes" to RAL classic.

Colors seen on screen may vary with the color on the wheel.

Brake Knob and Shaft

For Edson Steerers Only

960-G-230-A (\$143): "A" = 1-5/8", "B" varies
960-G-230-B (\$163): "A" = 3-3/8", "B" varies
960-G-230-J (\$120): "A" = 2-5/8", "B" varies

If you currently have the brake knob shown on the left where "A" has a length of 1-5/8" you will need a new brake knob and shaft. The Carbonautica wheels have a deeper hub so longer threads are needed to engage the brake. Measure "B" on your current brake knob and shaft and list it on the form on the next page. The specifications of the compatible brake knob and shaft are shown to the left on part 960-G-230-J. Threads fit shafts on Edson pedestals.
