

Edson Wheel Pilot Installation Kit #925-426V

The Edson Wheel Pilot Installation Kit (#925-426V) for Edson's #476 Vision II Compact Pedestal comes complete with all the items required for installing your Raymarine wheel pilot:

- *Motor Tube Ring and Silicone Gasket (requires 2-1/4" hole saw)
- *Touch Up Paint
- *Wheel Drive Post
- *Fasteners for Motor Tube Ring and Wheel Drive Post (requires 3/8" drill bit)
- *Tef Gel

The Edson #476 Vision II Compact Pedestal is delivered with a 1/4" pilot hole for the pilot drill of a 2-1/4" hole saw. This hole is located in the position required to mount the Wheel Pilot Motor.

The Motor Tube Ring hole is to be drilled out by the installer and the bare edge of aluminum will need to be de-burred/sanded and painted with the supplied bottle of touch up paint.

The kit also include the Wheel Drive Post for holding the wheel drive, the Motor Tube Ring and Silicone Gasket for the motor, required stainless steel fasteners, and Tef Gel to limit galvanic corrosion between the stainless fasteners and the aluminum pedestal.

**Refer to the Raymarine Wheel Pilot Installation Guide supplied with your Wheel Pilot for instructions and details on installing the pilot to your steering system, proper alignment, and calibration.*
