

# EDSON® **Quadrant & Radial Drive Wheel Data Sheet**

All Quadrants and Radial Drive Wheels are custom machined to the measurement taken on the rudder post. The measurement on the rudder post should be taken with calipers to an accuracy of 0.001" [for example, a 2.375" diameter].

**Quadrants and Radial Drive Wheels are non-returnable - Please measure carefully**  
 See current Edson price page for machining charges on:  
 special or square bores, key ways, or set screws.
