

EDSON PUMPS

261 Pumpout Hose Assemblies

Edson Pumpout Hose Assemblies start with a durable, lightweight, and flexible hose. The hose is then connected to a clear check valve (B), a 90-degree ball valve (C), and a quick clamp deck fitting adapter (I) to make a simple, clean connection to any boat's waste deck fitting. Edson's Hose Assemblies are available in standard lengths and are offered in custom lengths up to 100ft long.

#261-25-150
 25ft Assembly Shown
 Custom Length Assemblies from 5ft-100ft

Assembly Components (Included)

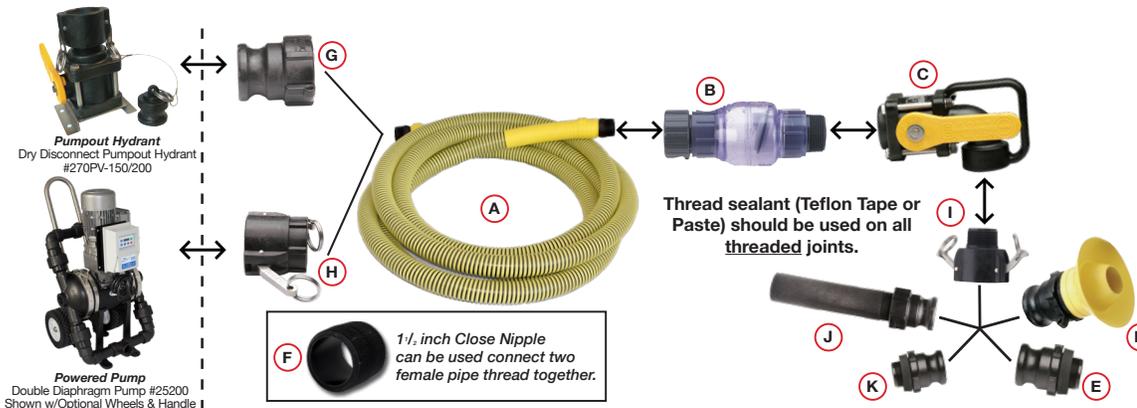

Deck Adapters (Included)

Deck Assembly Instructions: Insert appropriate size deck adapter to fit boat waste/sewage connector.

NOTE: Use threaded adapters for best results. Potty Wand is for portable toilets ONLY, NOT FOR BILGES

1. Thread appropriate Quick Connect Adapter (Fitting G or H) to fit either the existing suction hydrant or pump inlet.
2. Then Thread all components as shown below.

Hose Assembly Length	Edson Part Number
25ft	#261-25-150
33ft	#261-33-150
50ft	#261-50-150
75ft	#261-75-150
100ft	#261-100-150
