- Twist grip speed control
- Neumatic Drive Tires
- Stainless Steel Hose Rack
- Accomodates 60 or 40gal tank
- 20' Discharge Hose

29110/28205 Self-propelled Pumpout Cart
(Shown with 25261 pump option installed)
(Shown with 28205 40gal tank option installed)

General Description

The 29110 electric self propelled cart with 28205(40 gal) pump out skid is an ideal way to provide pump out service throughout the marina without installing plumbing on the docks. The electric powered cart reduces the effort to climb gangways and transport the pump-out to where it needs to go. Boat yards frequently need to pump out a boat either when in dry dock or when pulling the boat for the season. The portable design can be integrated into a plumbing infrastructure to provide a fixed station throughout the marina and become portable as needed. The unit can also double as an electric mule to move boat trailers (40 gallon unit only). The versatile cart is designed to accept our diaphragm pump options, or the powerful peristaltic options shown below.

Model 25261
Double Diaphragm

- 3/4hp 120V 1ph *
- 25' Suction Lift
- 25' Discharge Head
- Up to 25 GPM
- Poly Construction
